Krok 2

Zvoľte kategóriu „Link Resolver“

Edit Scopus External Linking Settings - Choose a Link Category

Link Categories

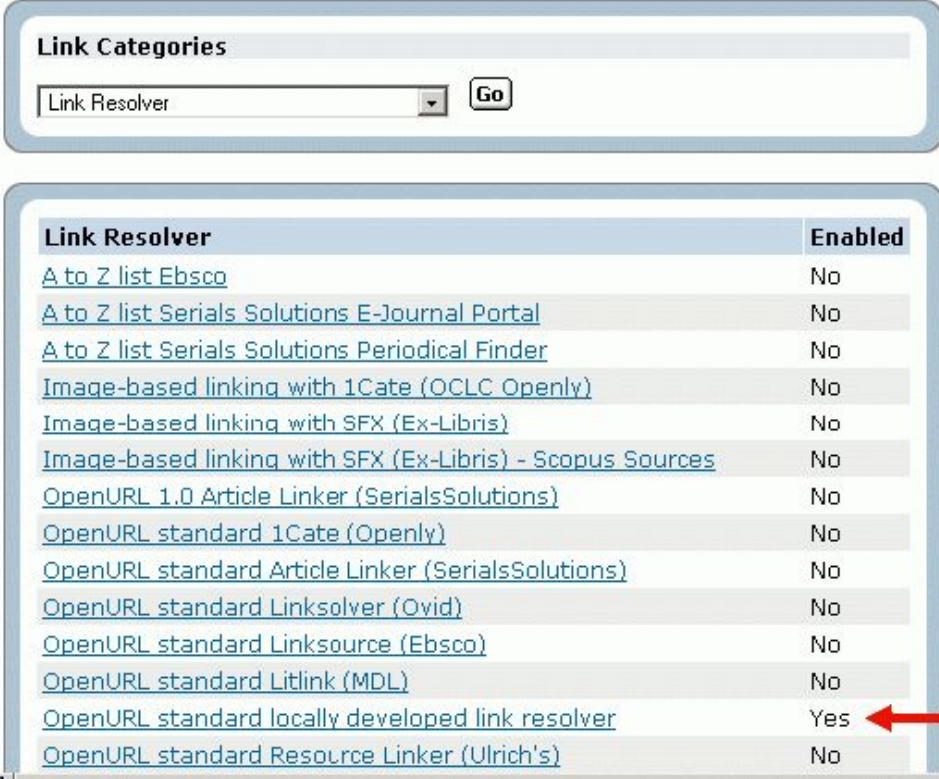

Link Resolver ←

i About Scopus
The settings of edited according to may modify the Priority of a link or locations the link is located.
To edit an External Linking Category to which the link belongs, then click on the category name to edit.

Krok 3

Zvoľte predvoľbu „OpenURL standard locally developed link resolver“

Edit Scopus External Linking Settings - Link Resolver

Link Categories

Link Resolver

Link Resolver	Enabled
A to Z list Ebsco	No
A to Z list Serials Solutions E-Journal Portal	No
A to Z list Serials Solutions Periodical Finder	No
Image-based linking with 1Cate (OCLC Openly)	No
Image-based linking with SFX (Ex-Libris)	No
Image-based linking with SFX (Ex-Libris) - Scopus Sources	No
OpenURL 1.0 Article Linker (SerialsSolutions)	No
OpenURL standard 1Cate (Openly)	No
OpenURL standard Article Linker (SerialsSolutions)	No
OpenURL standard Linksolver (Ovid)	No
OpenURL standard Linksource (Ebsco)	No
OpenURL standard Litlink (MDL)	No
OpenURL standard locally developed link resolver	Yes ←
OpenURL standard Resource Linker (Ulrich's)	No

i About Scopus
The settings of an edited according to may modify the priority of a link or locations the link is located.
To edit an External Linking Category to which the link belongs, then click on the category name to edit.
To change the order of the links, click on the link name to edit its Priority. You cannot change the order of the Abstract + Full Text or Publisher links. The links are displayed in the Order Document list of External Linking Categories. Account Specific Linking Categories: Account Specific Linking Categories: General Interest, Service.

Krok 4

Ako Base URL vložte: <http://ezb.uni-regensburg.de/vascoda/openURL?bibid=XXX>

Znaky XXX nahradzte svojim EZB-bibid (skratka kniznice v adrese nahľadu kniznice, teda veľké písmená po znamienku =, napr. pre Slov. pedagog. kniznicu platí bibid=SPGK; pre UK UPJŠ platí bibid=UPJS; pre Stavebnú fakultu STU platí bibid=SVF...).

Zvoľte „Enabled -> Yes“

Edit Scopus External Linking Settings - Link Resolver
